

Author Index for Volume 13 (1995)

- Abidali, A.F., 189
Abou-Zeid, A., 163
Agapiou, A., 149, 353
Ahmad, I., 163
Akintoye, A., 33, 105, 493
Al-Abed, A.M., 457
Alkass, S., 335
Aniekwu, A.N., 445
- Ball, M., 307
Bon, R., 253
- Campagnac, E., 3
Chan, A.P.C., 467
Chan, D.W.M., 209, 319
Chau, K.W., 15, 369
- Dawood, N.N., 53, 115
- Edwards, M., 485
Edwards, P.J., 485
- Fischer, M., 393
Fitzgerald, E., 493
Flanagan, R., 475
- Gardiner, P.D., 219
Griffith, A., 279
- Hall, K., 235
- Harris, F., 137, 189, 335
Headley, J.D., 279
- Ibanez-Guzman, J., 427
- Janszen, F., 43
Jucker, J., 393
- Kaplinski, O., 291
Kometa, S.T., 137
Kumaraswamy, M.M., 209, 319
- Loosemoore, N., 65
- Mak, S.W., 385
Maor, D., 173
Mazerolle, M., 335
McCaffer, R., 149, 353
Modin, J., 411
Mustapha, F.H., 457
- Navon, R., 173, 501
Nkado, R.N., 81
Norman, G., 475
- O'Brien, B., 393
Olomolaiye, P.O., 137
Oxman, R.E., 401
- Pietroforte, R., 253
- Price, A.D.F., 149, 353
Pries, F., 43
- Rahman, H., 23
Rooke, J., 511
Russell, J.S., 163
Rwelamila, P.D., 235
- Salminen, S., 299
Scott, S., 127
Seymour, D., 511
Shapira, A., 243
Simmons, J.E.L., 219
Sloan, B., 435
So, A.T.P., 95
Sommerville, J., 33
- Thiel, T., 291
Tribaldos, E., 335
- Walker, D.H.T., 263
Wild, S., 457
Williams, P., 197
Winch, G., 3
Wong, K.C., 95
Wood, A., 307
Worrall, H., 475
- Yamazaki, Y., 417
Yeong, C.M., 467

Book review index

- Human Resources Management in Construction*, Langford, D., Hancock, M.R., Fellows, R. and Gale, A.W., 525
Projecting Capitalism: A History of the internationalization of the Construction Industry, Linder, M., 184

Keyword index for Volume 13 (1995)

- A* score, *Z* score, company failure, multivariate discriminant analysis, 189
accident type, risk taking, subcontracting, 299
artificial intelligence, case-based reasoning, information systems, data sharing, knowledge sharing, 401
artificial neural network, information retrieval, building information; 411
- backward and forward linkage indicators, construction technology, input-output analysis, 253
benchmarking, time, productivity, team management, 263
bidding, information systems, expert systems, precasting, 115
bills of quantities, building measurement rules, estimating, pricing, quantity surveying, 485
building information, artificial neural network, information retrieval, 411
building material management, inventory, purchasing, suppliers, electronic data interchange, Just-In-Time, 105
building measurement rules, estimating, pricing, quantity surveying, bills of quantities, 485
building regulations, evaluation, decision support, cost-risk-benefit analysis, risk management, 197
building system, construction system, knowledge processing, interface object, constraint management, conceptual model, 417
building systems, multi-criteria optimization, housing policy, Poland, 291
business environment, severity index, Nigeria, 445
business process re-engineering, conflict, project management, strategy, 219
- CAL, computer-assisted learning, education, strategy, learning, 435
capacity, construction costs, systems analysis, coordination, economics, information technology, 393
case-based reasoning, information systems, data sharing, knowledge sharing, artificial intelligence, 401
cash flow, forecasting, construction management, resource-based, computer, 501
cash flow, construction output, construction new order, distributed lags, government policies, 33
civil engineering, equipment, replacement, economic life, retirement policy, 173
claims, expert systems, computing, planning, project control, delays, 335
client attributes, risk assessment, consultants, 137
communication, network analysis, problems, reactivity, risk, 65
company failure, multivariate discriminant analysis, *A* score, *Z* score, 189
computer, cash flow, forecasting, construction management, resource-based, 501
computer-assisted learning, education, strategy, learning, CAL, 435
computing, simulation, production planning, pre-casting, knowledge rules, scheduling, 53
computing, planning, project control, delays, claims, expert systems, 335
conceptual model, building system, construction system, knowledge processing, interface object, constraint management, 417
concordance analysis, rank correlation, variations, strategy, 467
concrete construction, economic evaluation, formwork design, high elevated slabs, shoring towers, 243
conflict, project management, strategy, business process re-engineering, 219
constraint management, conceptual model, building system, construction system, knowledge processing, interface object, 417
construction costs, systems analysis, coordination, economics, information technology, capacity, 393
construction duration, time-related models, productivity case study, Hong Kong, 319
construction industry, innovation, 43
construction industry, optimal linear correction, tender price index forecast, forecasting accuracy, construction price, 493
construction management, resource-based, computer, cash flow, forecasting, 501
construction materials, overseas trade, intervention analysis, 475
construction new order, distributed lags, government policies, cash flow, construction output, 33
construction output, construction new order, distributed lags, government policies, cash flow, 33
construction price, construction industry, optimal linear correction, tender price index forecast, forecasting accuracy, 493
construction project duration, productivity, time-cost models, Hong Kong, 209
construction robots, kinematic simulation, discrete-event simulation, design, 427
construction system, knowledge processing, interface object, constraint management, conceptual model, building system, 417

- construction technology, input-output analysis, backward and forward linkage indicators, 253
- construction time, influencing factors, ranking, contractor, descriptive survey, 81
- consultants, client attributes, risk assessment, 137
- contract, expert system, decision rule base, Hong Kong, fuzzy set, 95
- contracting system, social housing, Great Britain, France, project organization, 3
- contractor, descriptive survey, construction time, influencing factors, ranking, 81
- coordination, economics, information technology, capacity, construction costs, systems analysis, 393
- cost, management theory, total systems, intervention, culture, time, quality, 235
- cost-risk-benefit analysis, risk management, building regulations, evaluation, decision support, 197
- costs, dependence, spreadsheet, Monte Carlo simulation, probabilistic cost estimate, 369
- costs, public expenditure, employment, 307
- culture, time, quality, cost, management theory, total systems intervention, 235
-
-
- data sharing, knowledge sharing, artificial intelligence, case-based reasoning, information systems, 401
- decision rule base, Hong Kong, fuzzy set, contract, expert system, 95
- decision support, cost-risk-benefit analysis, risk management, building regulations, evaluation, 197
- delays, claims, expert systems, computing, planning, project control, 335
- dependence, spreadsheet, Monte Carlo simulation, probabilistic cost estimate, costs, 369
- descriptive survey, construction time, influencing factors, ranking, contractor, 81
- design, construction robots, kinematic simulation, discrete-event simulation, 427
- discrete-event simulation, design, construction robots, kinematic simulation, 427
- distributed lags, government policies, cash flow, construction output, construction new order, 33
-
-
- economic evaluation, formwork design, high elevated slabs, shoring towers, concrete construction, 243
- economic life, retirement policy, civil engineering, equipment, replacement, 173
- economic, information technology, capacity, construction costs, systems analysis, coordination, 393
- education, strategy, learning, CAL, computer-assisted learning, 435
- electronic data interchange, Just-In-Time, building material management, inventory, purchasing, suppliers, 105
- employment, costs, public expenditure, 307
- equipment, replacement, economic life, retirement policy, civil engineering, 173
- estimating, pricing, quantity surveying, bills of quantities, building measurement rules, 485
- evaluation, decision support, cost-risk-benefit analysis, risk management, building regulations, 197
- expert systems, decision rule base, Hong Kong, fuzzy set, contract, 95
- expert systems, precasting, bidding, information systems, 115
- expert systems, computing, planning, project control, delays, claims, 335
- expert systems, information technology, risk, probability, fuzzy sets theory, 385
-
-
- forecasting, models, skills, supply, 353
- forecasting, construction management, resource-based, computer, cash flow, 501
- forecasting accuracy, construction price, construction industry, optimal linear correction, tender price index forecast, 493
- formwork design, high elevated slabs, shoring towers, concrete construction, economic evaluation, 243
- France, project organization, contracting system, social housing, Great Britain, 3
- fuzzy set, contract, expert system, decision rule base, Hong Kong, 95
- fuzzy sets theory, expert systems, information technology, risk, probability, 385
-
-
- government policies, cash flow, construction output, construction new order, distributed lags, 33
- Great Britain, France, project organization, contracting system, social housing, 3
-
-
- high elevated slabs, shoring towers, concrete construction, economic evaluation, formwork design, 243
- Hong Kong, fuzzy set, contract, expert system, decision rule base, 95
- Hong Kong, construction duration, time-related models, productivity case study, 319
- Hong Kong, construction project duration, productivity, time-cost models, 209
- housing adequacy, housing effectiveness, Sana'a, Yemen, housing satisfaction, 457
- housing effectiveness, Sana'a, Yemen, housing satisfaction, housing adequacy, 457
- housing policy, Poland, building systems, multi-criteria optimization, 291
- housing satisfaction, housing adequacy, housing effectiveness, Sana'a, Yemen, 457
- influencing factors, ranking, contractor, descriptive survey, construction time, 81

- information retrieval, building information, artificial neural network, 411
- information systems, data sharing, knowledge sharing, artificial intelligence, case-based reasoning, 401
- information systems, expert systems, precasting, bidding, 115
- information technology, risk, probability, fuzzy sets theory, expert systems, 385
- information technology, capacity, construction costs, systems analysis, coordination, economics, 393
- information technology, organization, integration, shared data resource, re-engineering, 163
- innovation, construction industry, 43
- input-output analysis, backward and forward linkage indicators, construction technology, 253
- integration, shared data resource, re-engineering, information technology, organization, 163
- interface object, constraint management, conceptual model, building system, construction system, knowledge processing, 417
- intervention analysis, construction materials, overseas trade, 475
- inventory, purchasing, suppliers, electronic data interchange, Just-In-Time, building material management, 105
- Just-In-Time, building material management, inventory, purchasing, suppliers, electronic data interchange, 105
- kinematic simulation, discrete-event simulation, design, construction robots, 427
- knowledge processing, interface object, constraint management, conceptual model, building system, construction system, 417
- knowledge rules, scheduling, computing, simulation, production planning, pre-casting, 53
- knowledge sharing, artificial intelligence, case-based reasoning, information systems, data sharing, 401
- labour resources, planning, training, skills, 149
- learning, CAL, computer-assisted learning, education, strategy, 435
- management theory, total systems intervention, culture, time, quality, cost, 235
- matrix, quality management, quality cost, non-conformance, 23
- models, skills, supply, forecasting, 353
- Monte Carlo simulation, probabilistic cost estimate, costs, dependence, spreadsheet, 369
- Monte Carlo simulation, probability density function, risk analysis, subjective estimates, triangular distribution, 15
- multi-criteria optimization, housing policy, Poland, building systems, 291
- multivariate discriminant analysis, *A* score, *Z* score, company failure, 189
- network analysis, problems, reactivity, risk, communications, 65
- Nigeria, business environment, severity index, 445
- non-conformance, matrix, quality management, quality cost, 23
- optimal linear correction, tender price index forecast, forecasting accuracy, construction price, construction industry, 493
- organization, integration, shared data resource, re-engineering, information technology, 163
- overseas trade, intervention analysis, construction materials, 475
- planning, training, skills, labour resources, 149
- planning, project control, delays, claims, expert systems, computing, 335
- Poland, building systems, multi-criteria optimization, housing policy, 291
- pre-casting, knowledge rules, scheduling, computing, simulation, production planning, 53
- precasing, bidding, information systems, expert systems, 115
- pricing, quantity surveying, bills of quantities, building management rules, estimating, 485
- probabilistic cost estimate, costs, dependence, spreadsheet, Monte Carlo simulation, 369
- probability, fuzzy sets theory, expert systems, information technology, risk, 385
- probability density function, risk analysis, subjective estimates, triangular distribution, Monte Carlo simulation, 15
- problems, reactivity, risk, communication, network analysis, 65
- procurement, small works, 279
- production planning, pre-casting, knowledge rules, scheduling, computing, simulation, 53
- productivity, team management, benchmarking, time, 263
- productivity, time-cost models, Hong Kong, construction project duration, 209
- productivity case study; Hong Kong, construction duration, time-related models, 319
- programmes, project plans, supervisor's duties, schedules, 127
- project control, delays, claims, expert systems, computing, planning, 335

- project management, strategy, business process re-engineering, conflict, 219
- project organization, contracting system, social housing, Great Britain, France, 3
- project plans, supervisor's duties, schedules, programmes, 127
- public expenditure, employment, costs, 307
- purchasing, suppliers, electronic data interchange, Just-In-Time, building material management, inventory, 105

- quality, cost, management theory, total systems intervention, culture, time, 235
- quality, methodology, research, paradigms, culture, 511
- quality cost, non-conformance, matrix, quality management, 23
- quality management, quality cost, non-conformance, matrix, 23
- quantity surveying, bills of quantities, building management rules, estimating, pricing, 485

- rank correlation, variations, strategy, concordance analysis, 467
- ranking, contractor, descriptive survey, construction time, influencing factors, 81
- re-engineering, information technology, organization, integration, shared data resource, 163
- reactivity, risk, communication, network analysis; problems, 65
- replacement, economic life, retirement policy, civil engineering, equipment, 173
- resource-based, computer, cash flow, forecasting, construction management, 501
- retirement policy, civil engineering, equipment, replacement, economic life, 173
- risk, probability, fuzzy sets theory, expert systems, information technology, 385
- risk, communication, network analysis, problems, reactivity, 65
- risk analysis, subjective estimates, triangular distribution, Monte Carlo simulation, probability density function, 15
- risk assessment, consultants, client attributes, 137
- risk management, building regulations, evaluation, decision support, cost-risk-benefit analysis, 197
- risk taking, subcontracting; accident type, 299

- Sana'a, Yemen, housing satisfaction, housing adequacy, housing effectiveness, 457
- schedules, programmes, project plans, supervisor's duties, 127
- scheduling, computing, simulation, production planning; pre-casting, knowledge rules, 53
- severity index, Nigeria, business environment, 445
- shared data resource, re-engineering, information technology, organization, integration, 163
- shoring towers, concrete construction, economic evaluation, formwork design, high elevated slabs, 243
- simulation, production planning, pre-casting, knowledge rules, scheduling, computing, 53
- skills, supply, forecasting, models, 353
- skills, labour resources, planning, training, 149
- small works, procurement, 279
- social housing, Great Britain, France, project organization, contracting system, 3
- spreadsheet, Monte Carlo simulation, probabilistic cost estimate, costs, dependence, 369
- strategy, learning, CAL, computer-assisted learning, education, 435
- strategy, business process re-engineering, conflict, project management, 219
- strategy, concordance analysis, rank correlation, variations, 467
- subcontracting, accident type, risk taking, 299
- subjective estimates, triangular distribution, Monte Carlo simulation, probability density function, risk analysis, 15
- supervisor's duties, schedules, programmes, project plans, 127
- suppliers, electronic data interchange, Just-In-Time, building material management, inventory, purchasing, 105
- supply, forecasting, models, skills, 353
- systems analysis, coordination, economics, information technology, capacity, construction costs, 393

- team management, benchmarking, time, productivity, 263
- tender price index forecast, forecasting accuracy, construction price, construction industry, optimal linear correction, 493
- time, quality, cost, management theory, total systems intervention, culture, 235
- time, productivity, team management, benchmarking, 263
- time-cost models, Hong Kong, construction project duration, productivity, 209
- time-related models, productivity case study, Hong Kong, construction duration, 319
- total systems, intervention, culture, time, quality, cost, management theory, 235
- training, skills, labour resources, planning, 149
- triangular distribution, Monte Carlo simulation, probability density function, risk analysis, subjective estimates, 15

variations, strategy, concordance analysis, rank correlation, 467

Yemen, housing satisfaction, housing adequacy, housing effectiveness, Sana'a, 457

Z score, company failure, multivariate discriminant analysis, A score, 189
